

ECOHOOG®

EQS-1050SM Quality Station

The EQS-1050SM Quality Control Cabin is an open air, cost effective mobile picking station with variable speed drive for optimising throughput. The EQS-1050SM is a standalone unit designed with forklift lifting points and lifting eyes for craning to ensure ease of movement. The unit compliments existing equipment maximising recovery with 4 manual material collection points. The EQS-1050SM is the epitome of minimal investment for maximum return.
